PROFILE

Creating real time projects excites me a lot. Currently I'm working on MERN stack & learning new technologies as well. Looking for a full time react-dev opportunity.

SKILLS

React

Javascript

Express.js

MongoDB

PROJECTS

E-COMMERCE STORE WEB APPLICATION

REACT + NODE + EXPRESS + MONGODB

- Full fledged app, which includes core features - products add to cart, user authentication, forgot password, search/sort functionality, checkout process, payment gateway, admin dashboard.
- Live Demo -> <https://splashstore.netlify.app>

SOCIAL MEDIA WEB APP

REACT + NODE + EXPRESS + MONGODB

- Application where people can share their posts, like & comment on the post, follow/unfollow each other, profile page (display & cover pic), dark/light mode.
- Live Demo -> <https://splashtalk.herokuapp.com>

REAL TIME MESSAGING APP

REACT + SOCKET.IO

- Chat interface where people can message each other directly, create a group chat, add/remove members from group, search friends, receive live notifications from other chats when online.
- Live Demo -> <https://splashtalk.herokuapp.com>

EDUCATION
